Personal

After having worked in the healthcare sector, I'm ready for a career change. In my spare time I learned by self study. And discovered different programming languages and was stimulated. I wanted to expand this knowledge and with this motivation, I started a practice-oriented training course PHP developer at VDAB HAASRODE. Programming means to me create something that people can use in a clear and intuitive way. I'm looking forward to get started as a junior PHP developer.

Studies

2017 - 2018 **PHP developer at VDAB Haasrode**

2007 - 2009 **Youth and disabled care at Sancta-Maria Leuven**
